Alexis Guérard

Computer Engineering

Saint-Denis-de-Brompton, QC

alexis.guerard@hotmail.com | 873 200-6399 | alexleqc.github.io | LinkedIn | GitHub

Education

Université de Sherbrooke *Aug 2022 — Dec 2026*

Bachelor's Degree in Computer Engineering — Co-op Program

- Cumulative GPA: **4.00 / 4.30**
- Computer security specialization (Fall 2026): SDL, STRIDE, OWASP Top 10, SAST/DAST, OAuth2/OIDC

Professional Experience

Business Analyst Intern *Sherbrooke, QC*

Wolters Kluwer, DXG — TAA Canada *Summer 2026*

- Analyze needs for a tax preparation web application used by accounting firms and translate regulatory requirements into user stories and acceptance criteria
- Facilitate ideation workshops and design solutions with architecture and UX teams
- Act as the link between the PO, developers and QA; present sprint and PI demos (SAFe)

Frontend Developer Intern *Sherbrooke, QC*

Wolters Kluwer, DXG — TAA Canada *Fall 2025*

- Develop and maintain frontend features with Angular and RxJS, collaborating with the backend team on API integration
- Implement unit tests with Wallaby.js and integrate GitHub Copilot into the daily development workflow

Full-Stack Developer Intern *Québec, QC*

Boréalis, Product Development Team *Winter 2025*

- Develop and maintain a web application in JavaScript/TypeScript and Node.js in a Docker environment, with automated tests via Cypress
- Migrate and update a MongoDB database while managing Mongoose breaking changes

Analyst/Developer Intern *Sherbrooke, QC*

City of Sherbrooke, Information Technology Services *Fall 2023 / Summer 2024*

- Gather needs from users and managers, assess feasibility and configure solutions in the IBM Maximo enterprise software
- Write SQL queries and build interactive BIRT reports to track municipal operations

Projects

Atlas — Capstone Design Project (team of 8, external client) *Summer 2025 / Winter 2026*

Web platform for digitizing historical maps

- Coordinate the team: product backlog and sprints in Jira, task breakdown based on dependencies, deadline tracking and weekly dashboard
- Develop the shape extraction module (Python, OpenCV) of a Vue.js, Celery, PostgreSQL and Docker platform

Involvement and Leadership

- **Class of 68 Committee** (President, IT Representative, Secretary) — Faculty of Engineering, 2022 — 2026
- **Competitions** — Coveo Blitz 2024/2025 (10-hour bot, team of 4) and NorthSec CTF 2023/2024

Skills

Technical: Python, SQL, TypeScript/JavaScript, Java, C++; Angular, Vue.js, React, Node.js; PostgreSQL, MongoDB; Docker

Methods and tools: Agile/Scrum, SAFe, Jira, Confluence, Maximo, BIRT

AI: GitHub Copilot, Cursor, Claude, Antigravity

Languages: French (native), English (professional)
